

Advisory Services Overview

Melissa Schave, CPC, CPMA, CPCO

1. Overview

Schave Health Advisory provides provider-side coding, audit, compliance, and operational advisory services focused on professional fee and facility outpatient environments. The work is grounded in more than 20 years of healthcare experience across coding operations, compliance, provider education, client success, and healthcare technology. Specialty experience includes emergency department, hospital medicine, urgent care, and primary care, with deep expertise in E/M leveling, procedure coding, and diagnosis coding.

2. Core Service Areas

- Coding Quality and Audit Support
- E/M Leveling and Documentation Review
- Provider Education and Compliance Support
- Professional Fee and Facility Outpatient Advisory
- AI-Assisted Workflow Advisory
- Client Success and Implementation Support

3. Engagement Approach

1. Initial conversation to understand coding, documentation, or operational needs
2. Defined scope based on goals, workflow considerations, and available data
3. Focused review, audit, or advisory support
4. Clear findings, recommendations, and education
5. Optional follow-up support for implementation or continued alignment

4. Privacy and Secure Access

When access to sensitive healthcare information is required, work is performed under appropriate agreements and secure methods. Access is limited to the minimum necessary information, and unsecured communication methods are avoided. Administrative, physical, and technical safeguards are followed in alignment with HIPAA expectations.

5. What Makes This Different

This advisory model is intentionally focused on provider-side coding, audit, and compliance. The emphasis is on practical, real-world support in outpatient and professional fee environments, with deep experience in E/M leveling, documentation alignment, and coding quality.

6. Getting Started

Engagements typically begin with a conversation to understand needs and determine the appropriate level of support. Responses to inquiries are typically provided within one business day.

7. Important Notes

- Services are advisory in nature and do not constitute legal advice
- Work is limited to provider-side coding, audit, compliance, and documentation
- Inpatient coding, DRG validation, ICD-10-PCS, and payer operations are not included
